Message from The Principal

Hello everyone,

It's been another hot week this week with lots of fantastic learning at Eureka Public School.

Mr Evans has started work with the senior class learning about 3D printing where our students will be designing a name tag to be printed using the STEM Share Kit. Students are using the program TinkerCad where they construct a 3D design online and print a hard copy of the design using the special 3D printer.

A big thank you to Solomon and Emily who ran the first weekly assembly for the year and did a great job. A reminder that next week we will be holding our Year 6 leaders assembly in the library to welcome in our school leaders for 2019.

Finally we would like to thank all of the efforts from the parents in helping to refurbish the canteen. Special mention goes out to all of the parents who came in to help out on the weekend and after school last week to help move the process along. We can't wait till we can move into the sparkling new kitchen.

Enjoy the week everyone.

Eureka Public School News

Pertussis (Whooping Cough) Alert

6/02/2019

There has been confirmed cases of pertussis (whooping cough) in a person that attends Eureka Public School.

Pertussis caught at school can spread to any other members at home. Coughing spreads the infection to others nearby. Pertussis can be especially dangerous for babies.

Pertussis starts like a cold and progresses to bouts of coughing that can last for many weeks. Older children may just have a cough that is persistent and is worse at night. The infection may also occur in fully-vaccinated children.

What should people sick with pertussis do?

Pertussis is readily spread from an infected person to others by coughing and sneezing. If left untreated, it can be spread for up to three (3) weeks after the start of the infected person's cough.

Do not attend work, school or a childcare facility if you or any household members:

Have a cough as described above. Please see your doctor.

Are being tested for Pertussis by your doctor and waiting for test results.

Are being treated with antibiotics for whooping cough for at least five (5) days after starting the medicine

Keep coughing children away from babies.

Pertussis vaccines give good protection against infection but immunity fades. If your school-aged child has younger siblings, it's a good idea to check that they are up to date with their vaccines.

Information about this infection is available on NSW Health website <http://tinyurl.com/y85dnfjc>
